

WE ARE THE GOLD STANDARD TO THE PROFESSIONALS IN THERMOGRAPHY

ITC training will increase your credibility, enhance your career, and develop your thermography business. We offer IR training, certification and recertification in all aspects of thermography.

NEW ONLINE COURSES

01. THERMOGRAPHY LEVEL 1 (CERTIFICATION)

The learning objectives, contact hours, and written exam are based on the requirements outlined by ANSI / ASNT CP-105 and CP-189 of the American Society for Non-Destructive Testing. Join the thousands of professionals who have enhanced their careers thanks to this high-level course.

100% online course.

02. THERMOGRAPHY LEVEL 2 (CERTIFICATION)

The learning objectives, contact hours, and written exam are based on the requirements outlined by ANSI / ASNT CP-105 and CP-189 of the American Society for Non-Destructive Testing. Join the thousands of professionals who have enhanced their careers thanks to this high-level course.

100% online course.

03. CATEGORY I THERMOGRAPHY (THEORY)

This course is based entirely on the ISO 18436-7 standard and allows you upon completion of all requirements to opt for ITC Category I certification. Join the thousands of professionals who have enhanced their careers thanks to this high-level course.

100% online course.

04. CATEGORY I THERMOGRAPHY (CERTIFICATION)

This course is based entirely on the ISO 18436-7 standard and allows you upon completion of all requirements to opt for ITC Category I certification. Join the thousands of professionals who have enhanced their careers thanks to this high-level course.

Course requires one day in person for labs and certification exam.

05. CATEGORY II THERMOGRAPHY (CERTIFICATION)

This course is based entirely on the ISO 18436-7 standard and allows you upon completion of all requirements to opt for ITC Category II certification. Join the thousands of professionals who have enhanced their careers thanks to this high-level course.

Course requires one day in person for labs and certification exam.

06. sUAS THERMOGRAPHY LEVEL 1 (CERT.)

The learning objectives, contact hours, and written exam are based on the requirements outlined by ANSI / ASNT CP-105 and CP-189 of the American Society for Non-Destructive Testing. Join the thousands of professionals who have enhanced their careers thanks to this high-level course.

100% online course.

07. ADVANCED GAS DETECTION (OGI)

This class will teach students what gases can be found with FLIR optical gas imaging cameras and the size limitations of leaks. Some basics of infrared theory and heat transfer will be introduced to build a solid foundation.

100% online course.

08. ELECTRICAL APPLICATIONS

Learn fundamental electrical concepts for the application of thermography in electrical applications, review with us more than 400 real cases of electrical applications in low, medium and high voltage systems.

100% online course.

09. FUNDAMENTALS OF THERMOGRAPHY

This one-day course is designing for the new user of infrared cameras and they focus on the fundamentals that every thermographer requires, in which thermography is used for a variety of applications in Condition Based Maintenance.

100% online course.

10. Si124 AND ULTRASOUND THEORY

This one day course is designing for the user new to Si124 equipment and the Theory of Ultrasound, so that they can make a correct implementation for a variety of applications in Condition Based Maintenance.

100% online course.

CENTRO DE FORMACIÓN DE INFRARROJOS
